About Me

Junior FullStack Web developer and mechanical engineer with one year of experience in the industry. Perseverant, responsible with good interpersonal skills, I am looking for front end or full stack developer position.

Professional Experience

Maintenance Engineer | Perenco-Tunisia
2021 – 2022

- adjustment of the Caterpillar engine valves of 3 engine-compressor posts (export-A, export-B and export-C).
- maintenance of the Waukesha engine of the "booster-B" station and changing the bearings for the 10 bearings of the engine.
- preventive maintenance every week for FFS or Fire Fighting System.
- redaction of daily reports on the state of the 6 machines (3 Boosters and 3 exports) and if there any breakdowns.
- working with two different teams. Each team has one supervisor and two technicians.

Education Background

- **GOMYCODE-Tunis**

  FuulStack Js Bootcamp
  Completed in 2023

- **ENIM-Monastir**

  Mechanical engineering degree
  Completed in 2019

Projects

Tips and Tricks web application   02/2023 – 03/2023

Educational website for beginners beginners who are searching for more information and advice
- for the back-end: Node.js, Express, Mongoose and MongoDB as a database management system.
- for the front-end: React.js,redux and of course many other libraries such as Bootstrap and React-icons.
